

## Why This new party?

The American political party system is broken. The New American Independent Political Party of the United States works to help solve this simply by allowing the people access to their own political system. This party helps anyone of good character to run for any political office.

### **The Broken political system.**

It is difficult if not impossible with the two party system for people of the country to have any part of the political process. The ideal of our system when it was founded by our founding fathers is that political leadership came from the community. When their duty was done, then they returned back to their normal life. The founding fathers did not envision professional politicians who spend their entire life as politicians. Because of the professional politician, the people of the country are not represented by their politicians. The politicians are spending their entire career searching for re-election at all costs. They are only serving their own political career.

Our two party system is now just a funding method for people to get into politics. You must either be a Democrat or a Republican to get funded. You must follow the guidelines and whims of the party that funded you as well as those who funded these parties. You will then have sold your soul to the party. The parties are closed to the general public and only allow friends of these parties to participate. Common people have been locked out of being able to serve their communities as politicians.

Political service should be more like jury duty rather than a career. One serves their community. When completed, they go back to our regular life. It is a privilege to be able to serve others as a politician, not a right. Our current system with two parties eliminates the ability for people other than professional politicians to run. Our political officials feel after all of their work, and spending their life in politics, they have a right to be elected. They have lost sight of the fact that serving is a privilege, not a right.

Since our political officials are serving themselves, they are not serving the community. If you asked them, they will all feel that they are serving their communities. They have spent their lives running for political office and have become isolated from the American public and have no idea what real life is for us. They are now rich and only know their rich political buddies. They are out of touch and unable to make decisions that are best for the community. They only know how to make decision based on their best interest, and then justify their actions as helpful to the community, whether it is or not.

Our political class (of which there should be no such thing) has become so out of touch that they feel that they are elite. Since they are elite (in their minds), they deserve more than the people. After all our national senators and representatives have their own health system and social security system. Theirs is much better than ours. They feel that they deserve it. After all they have spent their entire life as a politician, and all others are just the unwashed masses in their mind. We are just their minions to deceive and use. How come almost all of our federal political representatives are multi-millionaires?

Furthermore, our political class believes that the laws they write apply to the people, but not them? They have their own laws that they follow, but if anyone in the public would step out of line, they will be prosecuted. If a politician steps out of line, they just get away with it. Examples of this abound us daily. Our politicians are of poor character, and that is putting it mildly. How can our politicians expect the public to follow the law when they cannot even follow their own laws?

With our current two party system, it is a system in which the opposing parties simply bicker with each other simply because they are of opposite sides. The Democrats will all align together in opposition without considering the consequences to the country. As will the Republicans. They are partisan in their politics and are playing political games and have then lost sight of the effects of their actions on us. They only care about their political games and re-election. We suffer the consequences. Look at the health care issue in which almost no politicians voted for what they thought best for the public, just what is best for their political career.

Our politicians no longer represent us. By definition, the public is right. For example, if the public wanted more shovels and the vast majority of us wanted that, however silly it might sound, we should have this. Or representatives should not be saying they don't think you need shovels, so you don't get them. They are then not representing us, but only following what they think we should have, not what we want and need.

Our government now completely lacks transparency. Our politicians do not want you to know what they are doing! When was the last time that you yourself read a bill before it was passed by congress? Most are not publically posted! We only get second hand news that is less than trustworthy. Why can't we read it ourselves? The reason is that our politicians do not want you to see it. For example, how much pork is being added to these bills before they are passed. Why should we give money to bail out insurance companies who are making billions and are leaving states under the ACA (Obama care)? They have ripped us off once, why get ripped off again? Well our politicians are getting paid off in some way and do not want you to know.

There are many issues with our current two party system other than just these few issues.

In summary, our current system creates politicians who have little to no character. Worst of they all believe that they are of very high character. But Hitler also believed that he was a great person doing great things for the world, and we know that it worked out very, very badly!

Our politicians with our current party system are:

- Self serving
- Partisan and just bicker and get nothing done
- Lock regular people out of our political process
- Believe that they are elite and the public are just the unwashed masses
- Don't serve the public good
- Don't do what the public requests and needs
- Don't follow their own laws
- Don't have a transparent government
- Never leave office
- Get rich at the harm of the public

When a government does not serve the public good, the public is then forced to take matters into their own hands. This is how governments collapse and fall into anarchy. This will happen in areas with bad policing first, then expand into more and more public demonstrations which will then fall into riots. As it worsens, we will then fragment our society and all of the gains that many have sacrificed their lives and time for will begin to be lost. Our country has made great strides in bettering our civilization. For example, our relatives fought in a civil war which had to be fought to end slavery! Slaves had sacrificed their freedom to help build our country and finally achieved freedom! We do not want all of this lost because our politicians cannot make for a fair and equitable country. We cannot afford to let our political system cause the loss of our democratic republic.

### **How does the New American Independent Political Party of the United States help to solve this?**

This new party solves this problem very simply. It allows for the people, not the elite alone, to run for political office. We no longer want a country in which our politicians have never lived a real life. Do you think a federal politician even knows how much a gallon of milk costs? No they would not, they never have lived a real life, and if they did, it was a long time ago. We the people know what real life is, and what is needed.

The people will be able to have the honor of serving their community. They will also be more incline to return back to their previous work after they have served in office and not be career politicians. After all, they know what real life is like, and after being a politician many will prefer their previous life!

There are many, many advantages to this. Too numerous to even list.

The party is only looking for people who are of good character. It is not looking for people who have certain stances on issues as are both the Democrat and Republican party. It is a party focused on grass root, and is a party of the people, for the people, by the people. A candidate for office must only believe in the Article I (philosophy) section of The New American Independent Political Party of the United States platform. All other political stances are reserved for the particular candidate.

Further, the organization of the political party officials (chairman, etc) is a democratic process. In short the party itself is democratic.
